

## Faculty Title Change

Effective Date: 3/21/22

Faculty title changes are primarily through the formal UF promotion process. However, there are a few exceptions.

- The faculty member may apply for and be selected into a different title that has posted.
- UF may change the titles of all the faculty in a particular title.
- For example, there is currently as of 2021 a draft proposal to make these changes at the Provost level.
  - Lecturer to Instructional Assistant Professor
  - Senior Lecturer to Instructional Associate Professor
  - Master Lecturer to Instructional Professor
- An individual title may be changed with the following approvals:
  - Unit Leader
  - IFAS Deans
  - UF Provost

The Associate Provost has stated that for those with a split position; 20% of a faculty member's time has to be spent teaching or performing extension work and 80% must be performing research or extension in order to change to a non-tenure track Professor title. The options would be:

- 20% teaching / 80% research
- 20% teaching / 80% extension
- 20% extension / 80% research

The title change is made effective via an Update Position ePAF initiated by the unit.

9-month faculty must have the title change effective at the beginning of the fall or spring semester.
